U.S.A., ME, Gulf of  
Maine Distinct  
Population Segment.  
The GOM DPS  
includes all  
anadromous Atlantic  
salmon whose  
freshwater range  
occurs in the  
watersheds from the  
Androscoggin River  
northward along the  
Maine coast to the  
Dennys River, and  
wherever these fish  
occur in the estuarine  
and marine  
environment. The  
following impassable  
falls delimit the  
upstream extent of  
the freshwater range:  
Rumford Falls in the  
town of Rumford on  
the Androscoggin  
River; Snow Falls in  
the town of West  
Paris on the Little  
Androscoggin River;  
Grand Falls in

Salmon, Atlantic	<a href="#">Salmo salar</a>	Fishes	<p>Township 3 Range 4 BKP WKR, on the Dead River in the Kennebec Basin; the un-named falls (impounded by Indian Pond Dam) immediately above the Kennebec River Gorge in the town of Indian Stream</p> <p>Township on the Kennebec River; Big Niagara Falls on Nesowadnehunk Stream in Township 3 Range 10 WELS in the Penobscot Basin; Grand Pitch on Webster Brook in Trout Brook Township in the Penobscot Basin; and Grand Falls on the Passadumkeag River in Grand Falls Township in the Penobscot Basin. The marine range of the GOM DPS extends from the Gulf of Maine, throughout the Northwest Atlantic Ocean, to the coast of Greenland. Included are all associated conservation hatchery populations used to supplement these natural populations; currently, such conservation hatchery populations are maintained at Green Lake National Fish Hatchery (GLNFH) and Craig Brook National Fish Hatchery (CBNFH). Excluded are</p>	17.95 (e)	N/A
